USE YOUR EXISTING 18V LI-ION MAKITA BATTERIES TO POWER THESE 36V MACHINES

2x 18v Batteries will power the 36v DC motor. The 36v DC motor delivers more power and run time without leaving the 18v Lithium-ion platform.

When different capacity batteries are used together (for example, 4.0Ah BL1840 and 3.0Ah BL1830, or fully charged BL1830 and 70% charged BL1830), the machine stops when the battery with least capacity is empty.

DON'T IGNORE DUST

Dust is no longer something that can be swept under the carpet; it is a real and ever present danger within the construction industry and other working environments where airborne dust can occur.

Makita offer a wide range of products with integrated dust collection systems and also compact battery operated dust collection systems that enable you to work safely without losing the freedom that cordless products offer.

Makita are committed to reducing dust and delivering effective solutions and services that meet your requirements and improve your productivity. We challenge ourselves to new initiatives which deliver the high standards you expect with the Makita brand while reducing the risk you are exposed to.

Class L – Removes 99.0% of dust with limit value for occupational exposure >1.0 mg/m³.

Suitable for processes involving mica, china clay, gypsum.

Class M – Removes 99.9% of dust with limit value for occupational exposure > 0.1 mg/m³.

Suitable for processes involving mica, china clay, gypsum, wood dust, such as softwood and hardwood and silica dust, such as masonry, concrete.

DUST EXTRACTION (WET AND DRY) 446L / 447L / 447M

'Xtreme Clean' filter technology 447 models

This automatic cleaning system utilises reversed air flow to constantly clean one half of the filter, retaining maximum suction and filtration whilst drawing contaminated air through the other side.

Valves switch airflow from one chamber to the other forcing air in opposite directions clearing dust away from the filter one side at a time.

High specification filters 'L' or 'M' class for ultimate dust control.

'Push and Clean' technology 446 model

Fast and simple semi-automatic cleaning system which cleans the filter in a similar way to Xtreme clean.

1. Place your hand over the suction pipe creating a vacuum.
2. Activate the cleaning process by pressing the button.
3. Air is sucked in to the vacuum and forced through the filter, clearing the dust away into the bottom of the tank.
